Experience

Frontend Engineer

Jun 2024 – Present

Nodeops

Bengaluru, IN

- Led the frontend development for Nodeops Console, Nodeops Cloud, and other Nodeops products, designing and building the entire user interface
- Created a library of custom reusable components, improving development speed and ensuring consistent design across the platform.
- Added animations and transitions to improve the user experience while keeping performance smooth.
- Improved performance to reduce load times and make user interactions faster and smoother across the platform.

SDE 2 - Frontend

Aug 2022 – Apr 2024

Bitbns

Bengaluru, IN

- Led the development and launch of the Bitdroplet Dapp, resulting in a 25% increase in user engagement and revenue.
- Developed and implemented key features for Playota, a decentralized fantasy game, including Trumpcard game, referral system, user profile management, and optimized login flow.
- Improved loading speed by 60%, leading to a 20% rise in user engagement and a 15% expansion of Playota's customer base
- Enhanced user interface interactions and overall website experience through the implementation of smooth animations.
- Tech Stack: React, Svelte, Next.js, React Native, Web3 libraries

Full Stack Developer

Aug 2021 – Jul 2022

Linkdphone

Hyderabad, IN

- Developed and maintained a ticketing feature with 100% uptime, providing a seamless user experience and support. .
- Collaborated with the design team to enhance the product's UI, leading to a 25% increase in conversion rate and improved user retention.
- Deployed a WebSocket API leveraging AWS Lambda and API Gateway within a Node.js environment, augmenting real-time communication capabilities.
- Enhanced codebase efficiency by introducing reusable components and refining overall code structure, resulting in streamlined development processes.
- Tech Stack: Javascript, Jquery, Nodejs, AWS, Websockets

Projects

Ghost Wallet | *React, Typescript, Tailwind CSS, Fuel*

Jan 2025

- A privacy-focused wallet for the Fuel Network that generates unique addresses for each dApp connection. NEVER REVEAL YOUR MAIN WALLET TO ANYONE..
- <https://github.com/starc007/fuel-ghost-wallet/>

Stylr | *Next.js, TypeScript, Node.js, MongoDB, TailwindCSS*

2024

- Developed a no-code platform enabling users to create beautiful forms instantly
- Implemented a drag-and-drop interface for intuitive form building and customization
- Link: <https://stylr.xyz>

Image Compressor | *Rust*

2024

- Built a high-performance CLI tool for bulk image compression and resizing
- Implemented recursive directory processing while preserving original folder structures
- Link: github.com/starc007/Image-compression

Piqr | *Nextjs, Node.js, AWS, Zustand, Websockets, TailwindCSS*

Jul 2023

- Independently designed and developed a professional networking platform from scratch.
- Implemented Websockets to enable real-time messaging and notification functionalities.
- Applied image compression techniques to optimize file sizes, storing them efficiently on AWS S3.
- Used by 3000+ people, link: <https://piqr.in>

Technical Skills

Proficient with: Javascript, Typescript, React, Next.js, Node.js, Solidity, Svelte, Astro, TailwindCSS, React Native

Familiar with: AWS, Rust
